

I believe the recommendations from the ART committee to close Wanup Public School have not been thought through in the matter regarding value to the student..

Wanup offers a surplus of green space while other schools are grossly lacking.

To down size green space is not value to the student.

Rather than getting rid of schools with low enrollment, why not send new enrollment from over crowded schools to Wanup Public School.

--Wanup School is in great shape
--It has dedicated staff and community support

Example: community petitions, community volunteers for Breakfast Club etc.

Question #1:

Will the board stick to the projected time frame of "no change for two years".

Question #2:

What can we expect to change in our School ,in that time ,
should the Board decide to close the school?

Question #3:

Will services to the school be halted and education suffer as a result.
What of the 50 plus students in the French class. (1 teacher, plus 1 aid)

Question #4:

What of the leaning disabled students at the school?
Where are the teacher's aids?
I have been told ,
there will be no one to scribe for my learning disabled child.
She has a Board supplied lap top, but no one to help her with the technology.

Send new enrollments to overcrowded schools,
that emphasizes a problem that we are already in.

Thank you for your time,
Shelly Hagglund.
