Junior and Senior
Kindergarten

Rainbow Schools

Reaching minds. Touching hearts.

We bring learning to life

Children learn from a teacher

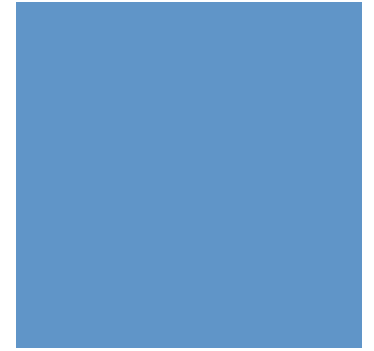

And an early childhood educator

From their peers, older and younger

From other resources

In a class of 26 children

In a space designed especially for them

They observe and they wonder

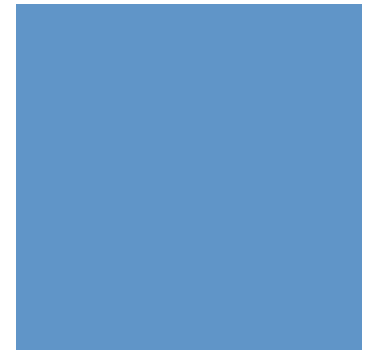

They investigate and inquire

About things that interest them

And the world around them

And they learn about things that matter

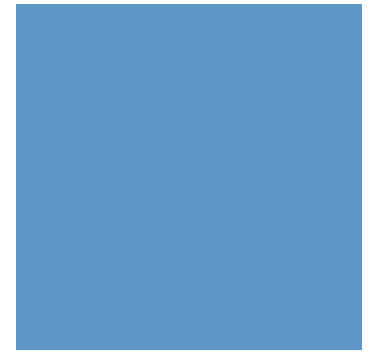

They read together

They write together

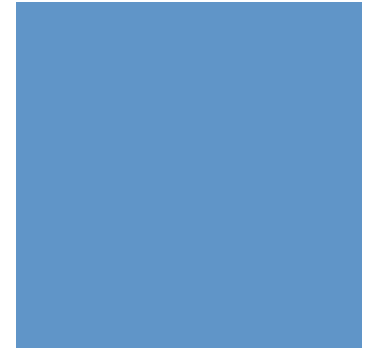

They create together

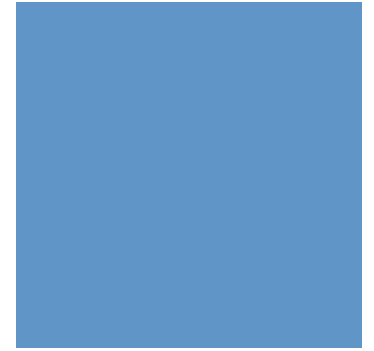

And they develop friendships

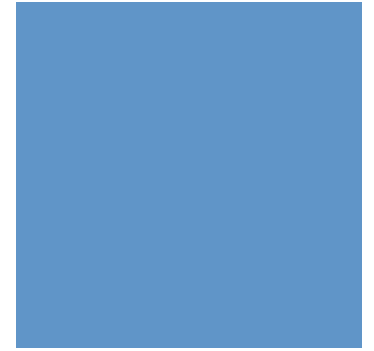

They sort and design

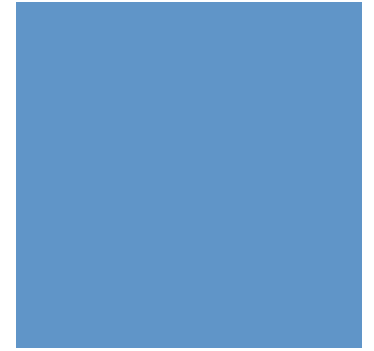

They create patterns

They measure

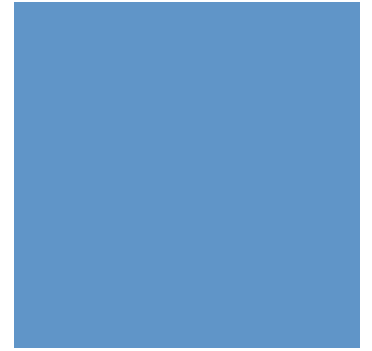

And they learn mathematics

They express themselves

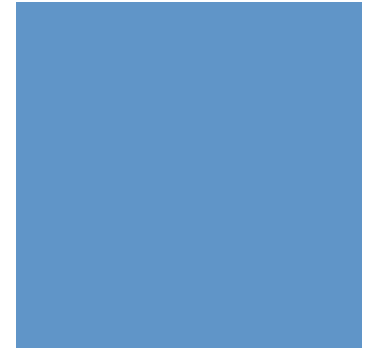

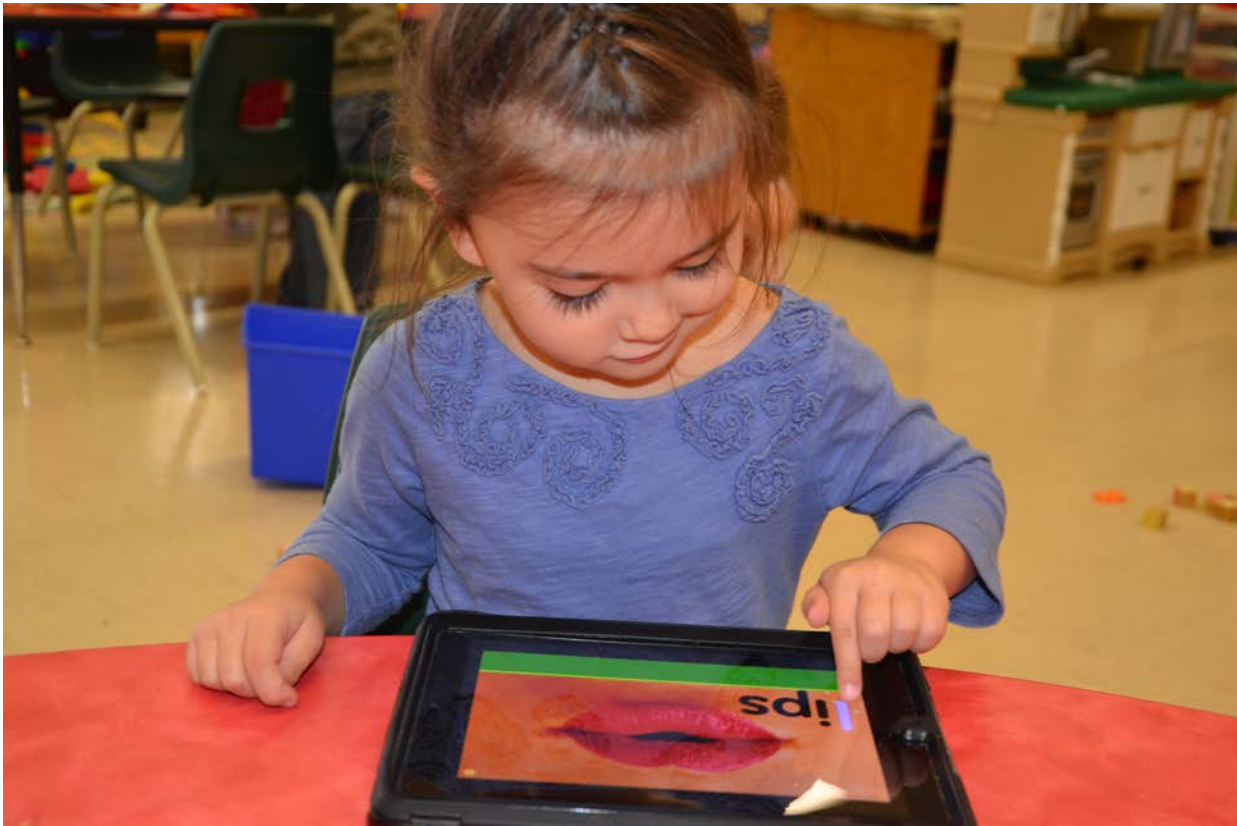

They paint

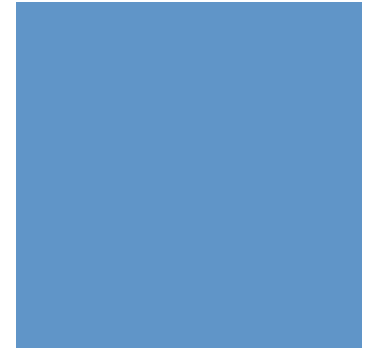

They draw

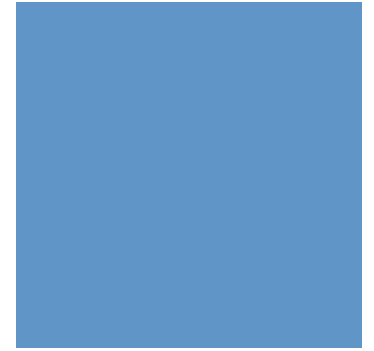

They use technology

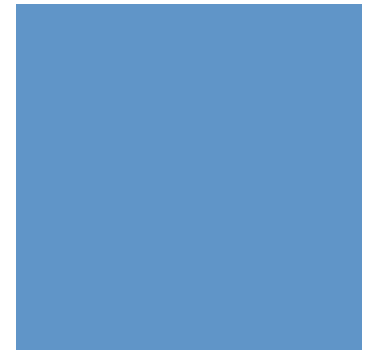

They create

They sing and perform

And they learn to think from different perspectives

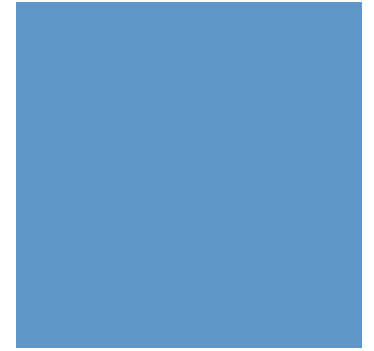

In small groups they plan

They design and build

They test ideas and theories

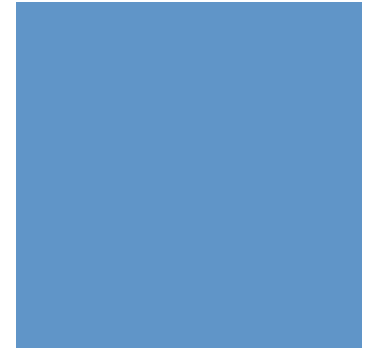

They pay attention to detail

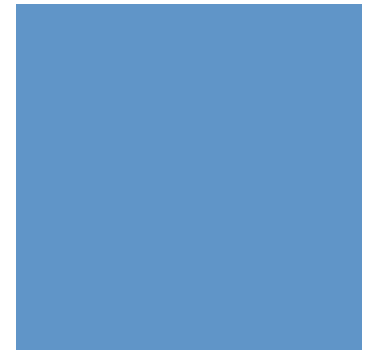

They learn to problem solve
and to be problem solvers

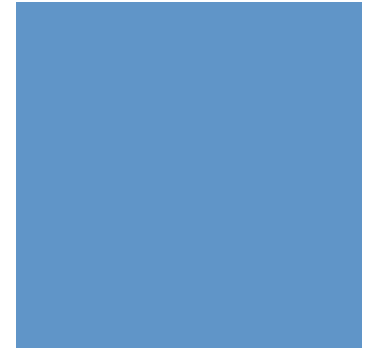

They make wishes
and they learn to set goals

They create memories
and build lasting friendships

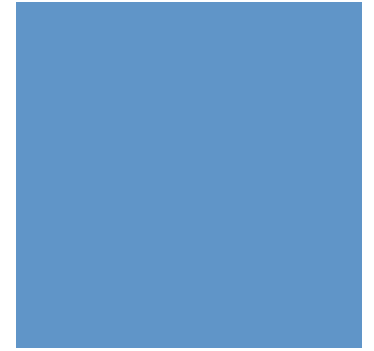

Full Day Every Day Kindergarten in Rainbow

- A two year program
- Of high quality learning designed to help each child reach their full potential recognizing their individuality
- That is child focused, inquiry based, relevant, age appropriate program and culturally and linguistically attuned
