

Shake and Spill

Materials:

Shake and Spill recording sheet

10 two-coloured counters for each player

Cup

How to Play:

Players select a recording sheet for the number they want to play with (e.g., if playing with '6', select the '6' recording sheet).

Place that number of counters in the cup. Shake and spill the counters. Place the counters on the recording sheet with all the same colour together (e.g., 2 red and 4 white).

Players state the combination they created "I have 2 red and 4 white, which makes 6 altogether"). Continue to play until all possible combinations have been found.
