

Two Steps Forward One Step Back

Materials:

Two Steps Forward Game Board for each player

Two dice

How to Play:

Player one rolls the dice and creates a two digit number. This number is recorded in the first footprint on the game board and player one finds the new total. Players take turns and repeat the process until the game board is complete. The player with the greatest total at the end of the game is the winner.

Variation: The player with the least total is the winner.

Variation: Select a target total (e.g., 200). The player closest to the target at the end of the game is the winner.
