

Fraction Match

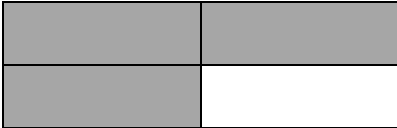

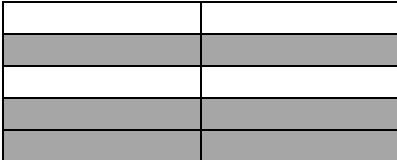

Materials:

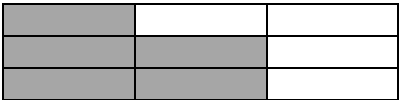

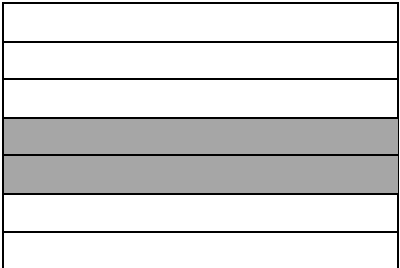

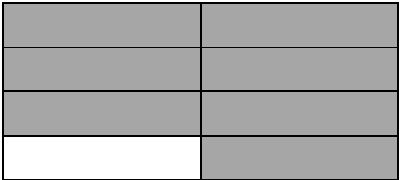

Fraction Match Game Cards

How to Play:

Players cut the fraction match cards and place them face down in a rectangular arrangement. Player one turns over three cards and tries to find the set of representations of the same fraction - the picture of the fraction, the fraction words, and the symbolic notation of the fraction. If all three cards represent the same fraction, the player keeps the cards. If two cards represent the same fraction, the player leaves these cards face up and turns the third card face down. If a subsequent player finds the cards with the same representation to the face up cards they keep all three cards. If none of the cards represent the same fraction, the player turns all three cards face down. Play continues until all cards have been matched.

Fraction Match Game Cards

$\frac{1}{2}$	One half	
$\frac{3}{4}$	Three quarters	
$\frac{2}{3}$	Two thirds	
$\frac{4}{5}$	Four fifths
