

24

Materials:

1-10 playing cards.

How to Play:

Players choose four cards from the deck and turn them over. The goal is to reach a total of 24. Players can use any operation to get a total value of 24.

For example: Player one picks 6, 3, 9, 2. Player 1 can add 9 and 3 to get a sum of 12. 12 can then be multiplied by 2 to get a product of 24.

Note: All the cards do not have to be used.

Variation: Players can work collaboratively or against each other, receiving a point every time they reach 24
