

Target One

Materials:

Target One Game Board

Target One Spinners, paper clip, pencil

Six counters per player (different colour for each player)

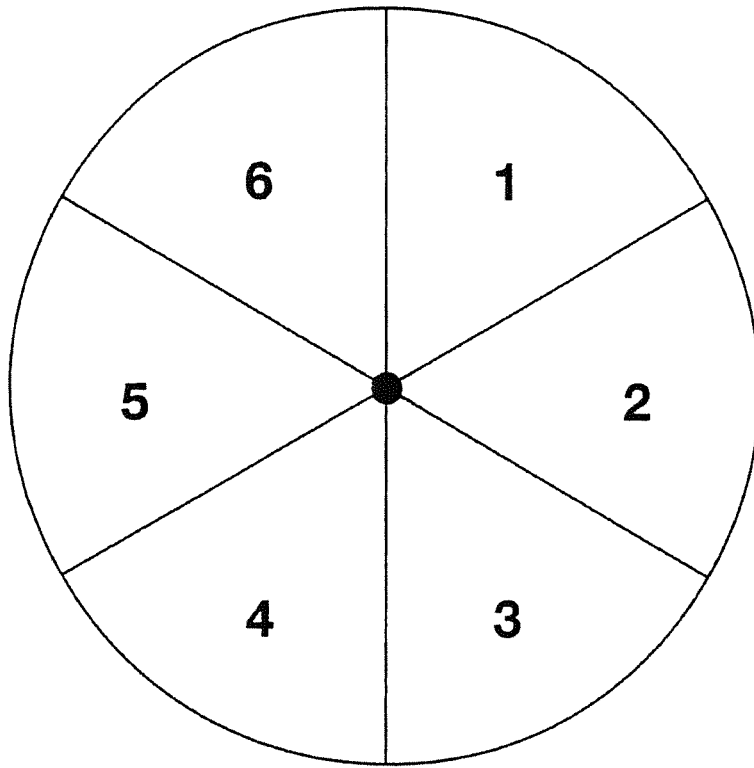

How to Play:

Each player puts a counter at zero on each of the number lines. Player one spins each spinner to make a fraction. Spinner one gives the numerator and spinner two gives the denominator.

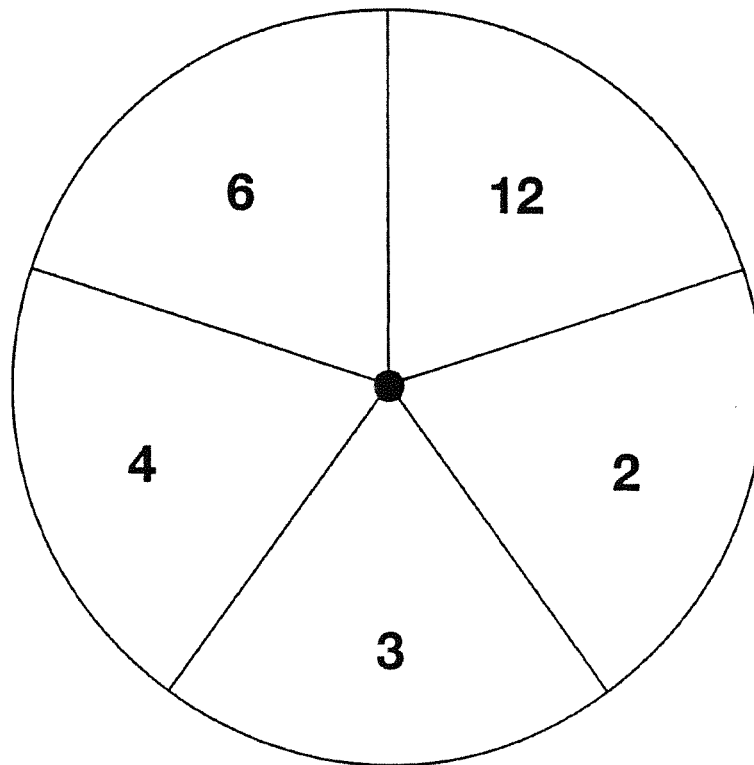

Player one moves a counter the same amount as the fraction (or an equivalent fraction) along one line. The counter cannot go past one. If the player cannot move a counter, the player must pass.

The game ends when a player has a counter on every number line.

Target 1: Spinners

Spinner 1

Spinner 2
