

Divide and Conquer

Materials:

Game boards

Spinner numbered 1-9

Token for each player

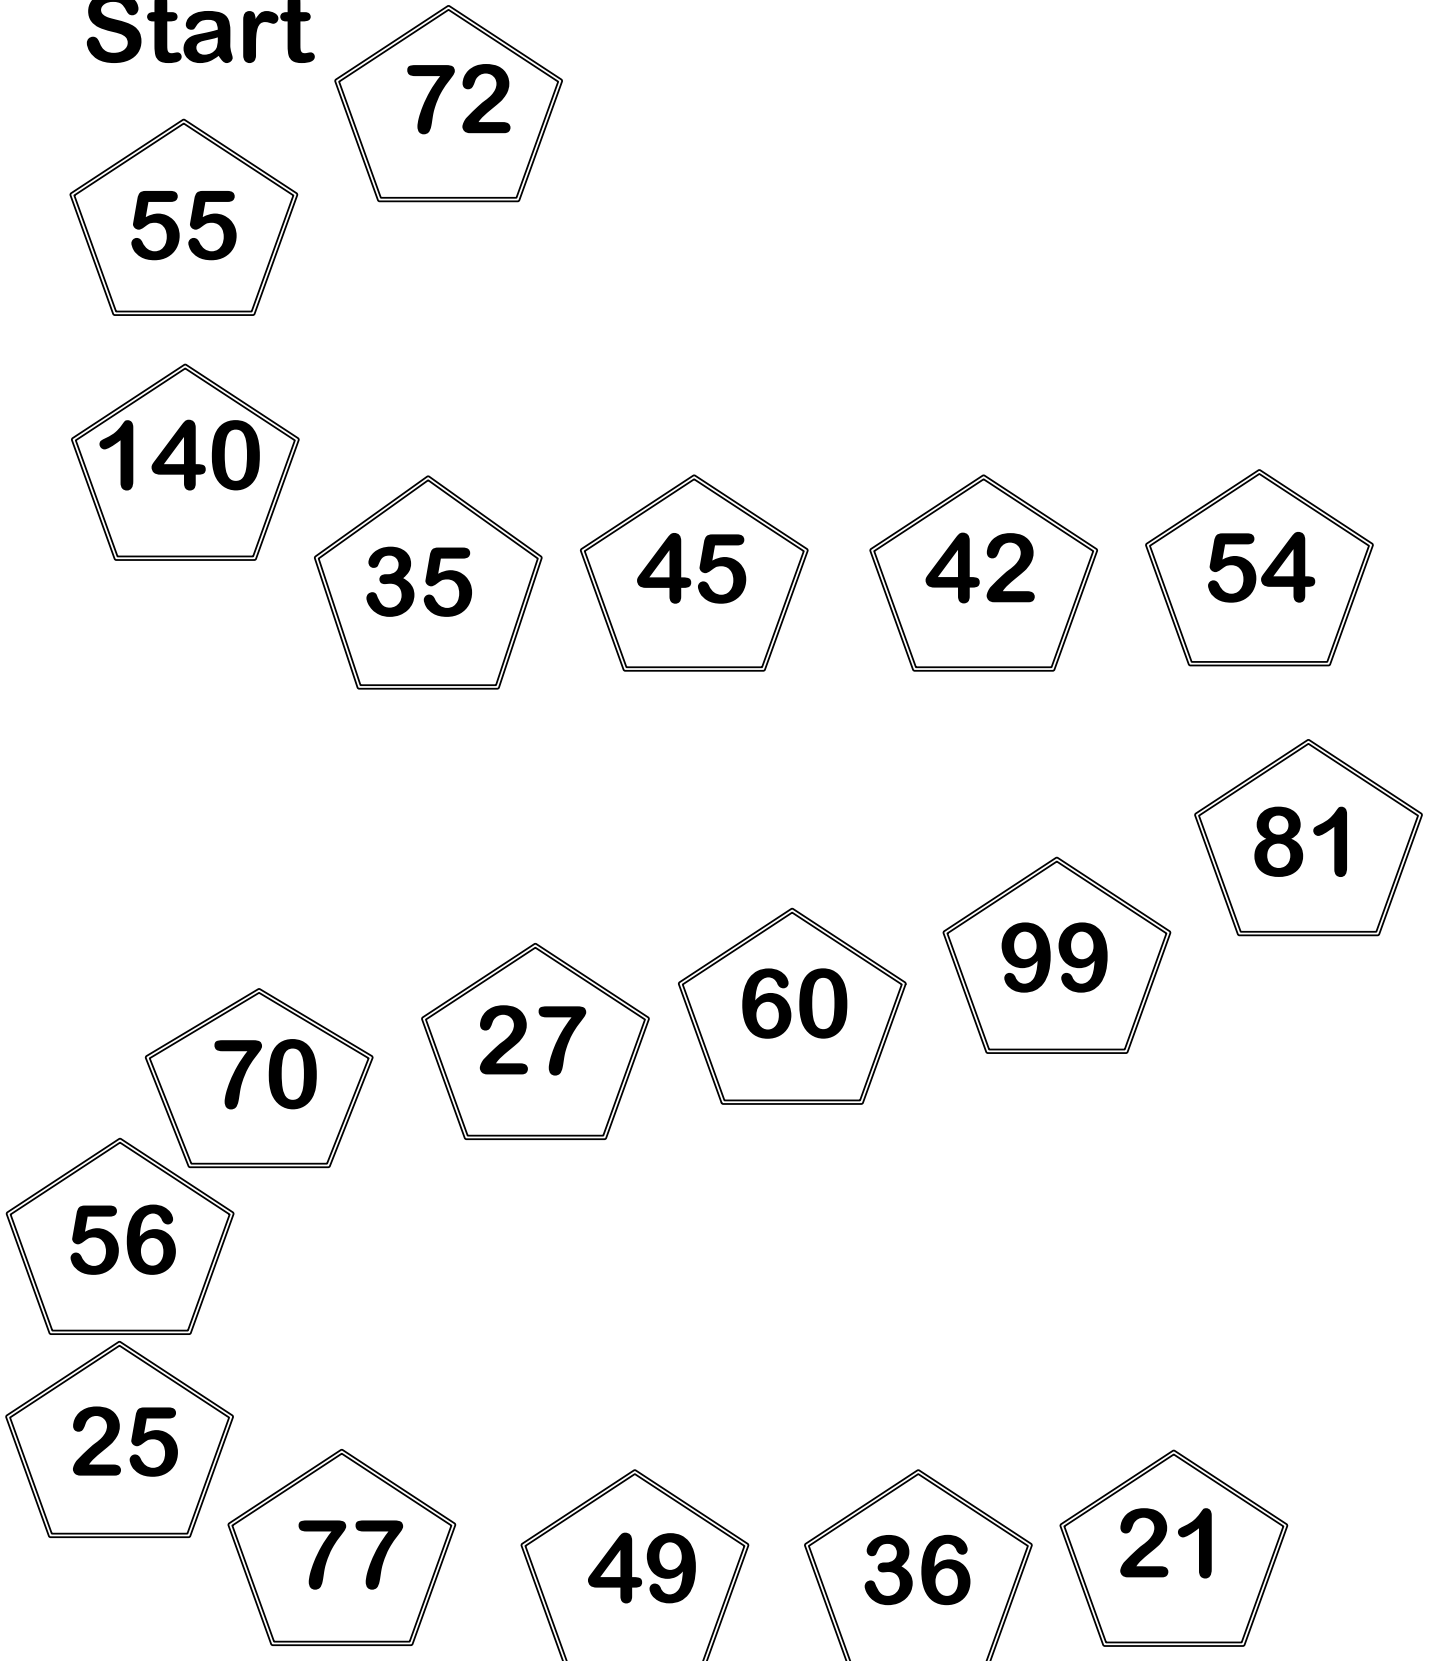

Paper clip and pencil

How to Play:

The first player spins the spinner and looks for the first number on the game board that can be evenly divided by the number spun. If the player can't move forward then they need to go back to the first divisible number. For example, if the player spins a 9, they can move forward to 81 on the game board. Players take turns moving along the game board. The winner of the game is the first player to reach the finish.
