Math Action Plan

Superintendent Lesley Fisher and System Principal Dan Koziar presented a slide show on the Ministry Math initiative that was announced in April 2023.

The Math Achievement Action Plan is part of the province's Student Achievement Plan. All schools are required to complete a Math Action Plan with school-level and classroom-level strategies and outcomes to address the three priority areas. To align across the system, the school improvement planning process now incorporates the strategies from the Math Achievement Action Plan within the board priority of Numeracy.

Along with the designated Board Math Lead, there is a team supporting mathematics throughout the system; the System Principal, 4 Elementary Math Coaches, a Kindergarten to Grade 6 Math Consultant, a Grade 7/8 Math Consultant and a Secondary Math Coordinator. The coordinators and consultants provide direct support to schools, while the math coaches work directly with teachers and students.

As part of the rollout, the Ministry identified a number of priority schools which were selected based on EQAO results from 2021-2022 which represent schools in the lowest 20% of achievement for the province. Each priority school has a math coach or consultant/coordinator attached to it. Direct support is provided to each school as the math coach works in conjunction with school administrators and classroom teachers.

In addition to classroom support, the team provides ongoing professional learning for staff. This includes math components during professional activity days and after-school sessions that are offered regularly and recorded so they remain accessible to everyone. As well, resources were created by a summer writing team that includes links and references to resources to support student learning.

Trustees expressed their gratitude for the comprehensive presentation and were given the opportunity to ask questions.
